

## **MAC OSX 10.6 PPD File Patch Release Notes**

<b>Subject:</b>	<b>10.6 PPD File Patch Installation Instructions</b>
<b>Model</b>	<b>ALL</b>
<b>Updated Machines Serial Number:</b>	<b>N/N</b>

Follow the Installation Instructions below to install the MAC 10.6 PPD Patch. The Patch will allow a new Kyocera Printer to be added.

1. On KMAconnect Download and run the OSX 10.4 & 10.5 Installer.
2. Download the **OSX10.6 permissionfix.zip file** to your Mac running OSX 10.6.
3. Double click the zip file to extract the contents to the desktop folder.
4. Double click the file called Kyocera OS X 10.6 solution. A Terminal window will open.  
Key in the password for the (Root) Administrator when prompted for the changes to take affect.

Note: When keying in the Administrator Password, the Terminal window will keep the Password Masked so it will not display any change in the window when the characters are being input. If there is no password assigned, one must be created before running the OSX10.6 solution file.

5. You can now add a Kyocera Printer in the normal manner.

Note: You will need to run Kyocera OS X 10.6 solution file again, every time you install a new Printer.
